

# Vibe Coding Prompts Library - QUICK START GUIDE

## File Location

**Main Workbook:** ~/vibe\_coding\_prompts\_library\_organized.xlsx

## 3-Step Quick Start

### **Step 1: START HERE (Always!)**

Open the  **START HERE - Pre-Session Setup** tab and copy ALL 4 prompts:

Prompt 1: `"Only make the exact changes I request--do not modify, remove, or alter any other code, styling, or page elements unless explicitly instructed."`

Prompt 2: `"Follow modern code quality standards and maintain consistency."`

Prompt 3: `"Help me refine and improve my prompts for better results."`

Prompt 4: `"Document your solutions so I can reuse them in future projects."`

**Why?** These guardrails save 30-40% of your AI credits by preventing unwanted changes!

## Step 2: Choose Your Tab

Your Goal	Go To Tab	Prompts Available
<b>Beautiful Homepage</b>	 Award-Winning Homepage Designs	40
<b>Modern Design</b>	 Visual Design & Modern Aesthetics	1
<b>Cool Animations</b>	 Interactive & Immersive Elements	2
<b>Great UX</b>	 UI/UX Excellence	24
<b>Sales Funnel</b>	 Conversion & Funnel Optimization	18
<b>Landing Page</b>	 Landing Pages & Lead Generation	15
<b>Online Store</b>	 E-commerce & Product Pages	3
<b>Dashboard</b>	 Dashboard & Admin Panels	7
<b>Build Trust</b>	 Social Proof & Trust Building	4
<b>Marketing</b>	 Content & Marketing	4
<b>API/Backend</b>	 API & Integration	3
<b>Speed &amp; Security</b>	 Performance & Technical	9
<b>SEO/Analytics</b>	 SEO & Analytics	5
<b>Testing</b>	 Testing & Debugging	3
<b>Custom Features</b>	 Feature Development	40

## Step 3: Filter & Copy

1. Click the filter arrow in the header row

2. Filter by your AI tool:

- Lovable (rapid prototyping)
- Replit (full-stack apps)
- ChatGPT (planning & strategy)

- Cursor (code-focused)
- v0 (UI components)

**3. Copy the prompt** from Column B

**4. Replace [placeholders]** with your specific info

**5. Paste into your AI tool** and iterate!

## 🎯 Common Project Recipes

### Recipe 1: SaaS Landing Page (Most Popular)

Tabs to use:

1. 🎯 START HERE (guardrails)
2. ✨ Award-Winning Homepage Designs (layout)
3. 💼 Landing Pages & Lead Generation (conversion)
4. 📱 Social Proof & Trust Building (testimonials)

Expected time: 30-60 minutes

Expected result: High-converting, modern SaaS page

### Recipe 2: E-commerce Store

Tabs to use:

1. 🎯 START HERE (guardrails)
2. 💰 E-commerce & Product Pages (products)
3. 🔍 UI/UX Excellence (navigation)
4. ⚡ Performance & Technical (speed)

Expected time: 1-2 hours

Expected result: Fast, conversion-optimized store

### Recipe 3: Portfolio Website

Tabs to use:

1. 🎯 START HERE (guardrails)
2. ✨ Award-Winning Homepage Designs (hero)
3. 🚀 Interactive & Immersive Elements (animations)
4. 📱 Social Proof & Trust Building (work samples)

Expected time: 45-90 minutes

Expected result: Stunning, impressive portfolio

## Recipe 4: Sales Funnel

Tabs to use:

1. START HERE (guardrails)
2. Conversion & Funnel Optimization (strategy)
3. Landing Pages & Lead Generation (pages)
4. Content & Marketing (emails)

Expected time: 2-3 hours

Expected result: Complete automated funnel

## Recipe 5: Dashboard/Admin Panel

Tabs to use:

1. START HERE (guardrails)
2. Dashboard & Admin Panels (visualizations)
3. UI/UX Excellence (interface)
4. Performance & Technical (optimization)

Expected time: 1-2 hours

Expected result: Professional data dashboard

## Pro Tips

### For Best Results:

1. **ALWAYS start with START HERE prompts** - Non-negotiable!
2. **Be specific in [placeholders]** - The more detail, the better output
3. **Combine prompts from 3-5 tabs** - Layering creates professional results
4. **Start with Training Wheels prompts** - Graduate to No Training Wheels later
5. **Check tool compatibility** - Some prompts work better with specific tools

### To Save Credits:

1. Use **START HERE guardrails** every time
2. Choose **No Training Wheels** prompts when experienced
3. Include **visual references** (links to designs you like)
4. Be **specific and detailed** in your requests
5. **Test iteratively** - Start simple, add complexity

### For Award-Winning Designs:

1. Start with **Award-Winning Homepage Designs** tab
2. Add **Visual Design & Modern Aesthetics** for styling
3. Layer in **Interactive & Immersive Elements** for wow factor
4. Ensure **UI/UX Excellence** for usability
5. Don't forget **Social Proof & Trust Building** for credibility

## Understanding Prompt Types

Type	When to Use	Characteristics
<b>Training Wheels</b>	Learning, complex projects	Detailed, step-by-step
<b>No Training Wheels</b>	Speed, familiar patterns	Concise, expert-level
<b>Design</b>	Visual projects	UI/UX focused
<b>Strategy</b>	Business planning	High-level, ROI-focused

## 🛠 Tool Selection Guide

### Choose Lovable if:

- You want rapid visual prototypes
- Design is your main focus
- You need quick iterations
- **Best tabs:** Award-Winning Designs, Visual Design, Interactive Elements

### Choose Replit if:

- You're building full-stack applications
- You need backend + frontend
- Database integration required
- **Best tabs:** Feature Development, API & Integration, Dashboard

### Choose ChatGPT if:

- You're planning strategy
- You need content/marketing help
- Business planning required
- **Best tabs:** Conversion & Funnel, Content & Marketing, Strategy-type prompts

### Choose Cursor if:

- You're code-focused
- Refactoring existing code
- Need detailed technical control
- **Best tabs:** Feature Development, Performance & Technical, API & Integration

### Choose v0 if:

- Creating UI components
- Need specific design elements
- Component library building
- **Best tabs:** UI/UX Excellence, Award-Winning Designs

## Success Metrics

---

### After Using This Library, You Should See:

-  **30-40% fewer AI iterations** (thanks to START HERE prompts)
  -  **50% faster prompt finding** (organized tabs vs single sheet)
  -  **Higher quality outputs** (award-winning design prompts)
  -  **Better conversion rates** (conversion-focused prompts)
  -  **More professional results** (layered prompt combinations)
- 

## Tab Priority Quick Reference

---

### ESSENTIAL - Use Every Time

-  START HERE - Pre-Session Setup

### HIGH PRIORITY - Design Excellence

-  Award-Winning Homepage Designs
-  Visual Design & Modern Aesthetics
-  Interactive & Immersive Elements
-  UI/UX Excellence

### CONVERSION FOCUSED

-  Conversion & Funnel Optimization
-  Landing Pages & Lead Generation

### FEATURE BUILDING

-  Feature Development
-  API & Integration
-  Performance & Technical

### SPECIALIZED

-  E-commerce & Product Pages
  -  Dashboard & Admin Panels
  -  Social Proof & Trust Building
  -  Content & Marketing
  -  SEO & Analytics
  -  Testing & Debugging
- 

## ? FAQ

### Q: Do I really need to use START HERE prompts every time?

A: YES! They save 30-40% of your credits. Non-negotiable.

### Q: How many prompts should I combine?

A: Typically 3-5 prompts from different tabs work best for complex projects.

## Q: Training Wheels or No Training Wheels?

**A:** Start with Training Wheels when learning. Graduate to No Training Wheels for speed.

## Q: Which tool should I use?

**A:** Depends on your project:

- Visual/Design → Lovable or v0
- Full-stack → Replit
- Planning → ChatGPT
- Code-focused → Cursor

## Q: Can I customize the prompts?

**A:** Absolutely! Replace [placeholders] with your specifics. The more detailed, the better.

## Q: How do I know if a prompt is good for my tool?

**A:** Check the “Tool Compatibility” column (Column D) before using.
